

**First Question:- Q1) Read the text then answer the questions below: (18 points)**

The polar bear lives in the cold, snowy Arctic lands in the North Pole. It has a thick layer of fat underneath its skin and this helps to keep it warm. It also has a thick layer of fur all over its body, including the sole of its feet, which allows it to swim in the coldest seas without feeling the cold. Beneath the fur the skin is black, so it absorbs heat.

Unlike polar bears, penguins live in the South Pole and many live in Antarctica. Penguins keep warm with thick skin and lots of fat under the skin. Penguins have dark colored feathers on their back, which absorb heat from the sun to keep them warm>

\*\*\*\*\*

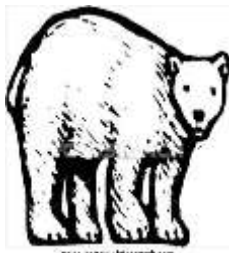

- 1) Where does the polar bear live? ...They live in the cold ,snowy Arctic lands in the North pole (2 points)
- 2) What do polar bears and penguins have in common? They both have a thick layer of fat underneath their skin (2 points)
