Question Number Three (24 marks)

A) Read the following text carefully, and then in your ANSWER BOOKLET answer all the question that follow. Your answer should be based on the text.

TEXT ONE: 1 (10 marks)

At school I was very good at English. Therefore, I decided on a career as an interpreter. My job now involves going to important conferences and seminars around the world. When a person speaks in English at a conference, I listen to what they say through headphones. I then translate into Arabic while the speaker is talking. I give the translation through headphones to other people at the meeting. Is it an easy job? Not at all. English is not the same in all English-speaking countries. For example, the English words that are used in India are sometimes different to the words that people use in the UK, the USA or Australia. As well as knowing regional English, you also need to know a lot of specialist language. Some of the words that are used to talk about business, science or law, for example, make it almost a different language! If you get an interview for a job, you will need to show that you have good listening skills and a clear speaking voice. You will also need to show that you can think quickly and that you are able to concentrate for long periods of time.

1. A successful translator is one who translates texts carefully without making any mistakes. Write down your point of view in two sentences.
2. Quote the sentence that indicates that Fatima decided to work as an interpreter.
3. According to the text, write the sentence that shows there are differences between the English terminology used in India and other languages.
4. Mention the things that you need to do when the translator has an interview, mention of them.
5. What language did Fatima translate into at the conference?

TEXT TWO: 2 (10 marks)

Masdar City, which began its development in 2006 CE, will be the world's first carbon-neutral, zero waste artificially created city. Covering an area of six square kilometers, when it is completed in 2025 CE, it is expected to house more than 40,000 residents, 50,000 commuters, and 1,500 businesses involved in mainly environmentally-friendly products. The city will run entirely on renewable energy sources. It is built on an advanced energy grid which monitors exactly how much electricity is being used by every outlet in the complex. Energy will be provided by solar power and wind farms, and there are also plans to build the world's largest hydrogen plant. A desalination plant will be used to provide the city's water, with 80% of water used being recycled. Biological waste will be used as an energy source too, and industrial waste will be recycled.

- 1- Certain power resources will supply Masdar city with energy. Write down two of these resources.
- 2- Many procedures will be implemented to reduce carbon footprint in Masdar City. Write down these procedures.
- 3- What will happen for Biological and industrial waste in Masdar City?
- 4- Find a word in the text that means (**producing no waste**).
- 5- What does the underlined pronoun (it) refer to?
