I. Read the following text and answer the questions below .

[10 points]

Climates affect the people who inhabit the region as well as the plants and animals that live there .

There are eight main types of climate – polar , tundra , mountain , cool temperate , warm temperate ,

desert , monsoon and tropical . Countries with the monsoon climate suffer because it changes suddenly.

Areas where there is less than 25 centimetres of rain every year have a desert climate . It is very hot

during the day and too cold at night .Countries near the Equator have a tropical climate .**They** are always h hot and wet and rainforests grow there . Today , world climates are changing because of global warming . If we continue to produce large amounts of greenhouse gases , the world will become hotter . Polar areas

will melt and there will be a rise in sea levels .There will be floods and droughts in many places as well .

1. How many types of climate are there ?

.....
