### Sample report 1

#### Participation in the arts in London, England

##### Introduction

The aim of this report is to provide information concerning participation in the arts in London, England. It will include factors which discourage people from taking part, and suggest ways to increase participation.

##### Current situation

I interviewed people between the ages of 15 and 50 who live in London. Just under half of the people who were interviewed said they took part in music, drama or art. The most popular activity was taking music lessons, followed by going to art galleries and concerts. Drama and dance classes were popular with people in their thirties, because classes are social occasions.

##### Factors preventing fuller participation

About 40 per cent of people asked said that they did not enjoy the arts, giving reasons such as boredom for this. The other 60 per cent said that most arts-related activities were too expensive, such as theatre visits or music lessons. Some people said that finding a good teacher was difficult.

## **Recommendations**

It is important to focus on those who currently do not participate in the arts at all by:

- arranging a subsidised program for those who want to study music or dance but do not have enough money
- publicising and presenting cheaper theatre performances
- further research into reasons why people do not enjoy the arts.

### Worldwide transport in the future

It is of course difficult to say exactly what transportation will look like in the future, because of the infrastructural changes that are happening constantly at the moment. To me, it seems that transport may well have changed a lot in one hundred years' time.

Perhaps there will be no more private transport by 2115 CE. It is possible that public transport will have improved so much that no one will need their own cars. We might all be zooming around in ecologically-sound electric buses and trams that will take us to our destinations smoothly!

In order to get to other countries, we will be taking airships, which will be like aeroplanes but with more facilities available. It will be possible to travel to the other side of the world in much less time, because these airships will race around at a far greater velocity.

Finally, modes of transport are always changing, depending on many different factors, but one thing is certain; we will still be travelling the whole world! We might even be able to experience weightlessness by travelling to space!

## A founding father of farming

Ibn Bassal was a writer, a scientist and an engineer who lived in Al-Andalus in the eleventh century CE. He worked in the court of Al-Ma'mun, who was the King of Toledo. His great passions were botany, which is the study of plants and agriculture. Although he was a great scholar, he was also a practical man and all of his writing came from his own 'hands-on' experience of working the land.

### Cleft sentences

- A cleft sentence is a complex sentence (one with a main clause and a dependent clause). We can usually express the meaning of a cleft sentence with a simple sentence. It is called 'cleft' sentence because there are two parts to the sentence.
- We use cleft sentences in order to emphasise certain pieces of information.
- We join the most important piece of information to a relative clause, often with *who, where* or *that*.

- جملة cleft هي جملة معقدة (جملة تحتوي على جملة رئيسية وشرط تابع). يمكننا عادة التعبير عن معنى جملة cleft بجملة بسيطة. وتسمى الجملة "cleft" لأن هناك جزئين في الجملة.
- نحن نستخدم جملة cleft من أجل التأكيد على أجزاء معينة من المعلومات.

- When we start a sentence with *What*, we structure it as follows:

- *I would like to go to London next year.*
- *What I would like to do next year is go to London.*

- When we begin a cleft sentence with *It*, the relative clause usually begins with *that*.

- *Huda won the prize for Art last year.*
- *The person who won the prize for Art last year was Huda.*
- *The prize that Huda won last year was for Art.*

## Revision of relative clauses

تستخدم ضمائر الوصل كما يلي

<b>Who</b>	بعد اسم عاقل	I met the teacher who taught me last year.
<b>Which</b>	بعد اسم غير عاقل	Ali bought the car which he needed.
<b>When</b>	بعد اسم زمن	I remember the day when we first met.

الفرق بين which و where

تستخدم where بعد اسم مكان اذا تبعه فاعل ثم فعل

تستخدم which بعد اسم مكان اذا تبعه فعل مباشرة او اذا جاء لوصف المكان او اذا كان قبله او بعده حرف جر

- He went to the school ..... he studied.
- He went to the village ..... is peaceful.

### Defining relative clauses

- Defining relative clauses are used to identify which particular person, place or thing is being talked about. The defining relative clause is usually connected to the main clause by a relative pronoun such as *who*, *which*, *that*, *where* or *when*. We use *who* (and sometimes *that*) to refer to people; *which* and *that* to refer to things and animals; *where* to refer to places and *when* to times. *Whose* is the possessive form of *who*.

*He's the man whose daughter I met in Jordan.*

### Non-defining relative clauses

- Non-defining relative clauses are used to give more detail about a particular person, place or thing that is being talked about. The non-defining relative clause (underlined in the examples below) is usually connected to the main clause by a relative pronoun such as *who*, *which*, *where* or *when*.

*The Sahara desert, which is in Africa, is very hot.*

- A non-defining relative clause differs from a defining relative clause in that it gives additional, rather than essential, information and, without it, the sentence would still convey meaning.

*The Sahara desert is very hot.*

- Non-defining relative clauses follow a noun and are enclosed between two commas (or dashes or brackets), unless completing the sentence.
- In non-defining relative clauses, the relative pronoun is never omitted.

**1- Read the passage below and answer the questions.**

**The Giralda**

The Giralda tower, which is one of the most important buildings in Seville, Spain at just over 104 metres tall. The person who is believed to be responsible for the design of the tower, which was originally a minaret, is the mathematician and astronomer Jabir ibn Aflah. The architect of the tower was Ahmad Ben Baso, who began work in 1184 CE. He died before the tower was completed in 1198 CE. The design of the tower is believed to be based on the Koutoubia Mosque, which is in Marrakesh, Morocco, and the Hassan Tower in Rabat.

**Writing / Sample summary of an article**

**The Masdar City Megaproject**

The article discusses Masdar City, which is an example of a ‘megaproject’. A megaproject is a large-scale investment project designed to stimulate the economy and benefit the population. The author states that this project is currently being undertaken in Abu Dhabi and has attracted a lot of both positive and negative attention.

The author goes on to say that, whilst it has been praised for its environmentally-friendly status, some people argue that we should prioritise sustainability in already existing cities, rather than creating new ones.

Whatever the opinion, it is clear that the project is a landmark of urban planning and a precursor of megaprojects to come.

**Write a summary of the article about Masdar city on page 32 (STB). Remember to be concise and write between 100 and 150 words.**

Revision A  
A problem for our wildlife

1. Read the beginning of a newspaper article and answer the questions.

Despite the best efforts of conservation groups and their campaigns, the world's population of many species, including African elephants, tigers and seals, is still decreasing. It is people's increasing need for land and resources, along with hunting and fishing, which are responsible for this rapid decline in wildlife.

رغم الجهود الجيدة لمجموعات الحماية و حملاتهم ، إلا أن عدد كبير من أنواع الحيوانات ، بما فيها الفيلة الإفريقية ، النمر والفقمات ، لا يزال يتناقص . إنها حاجة البشر المتزايدة للأرض و المصادر ، إضافة إلى أن صيد الحيوانات و الأسماك ، مسؤول عن هذا التناقص السريع في الحيوانات البرية .

Exotic mammals such as big cats are threatened the most, but even common birds and insects in many parts of the world are in danger of dying out forever. According to a report by the World Wildlife Fund and the Zoological Society of London, wildlife populations around the world have been reduced by 52 per cent on average since 1970 CE.

تدييات غريبة مثل القطط الكبيرة هي الأكثر تهديدا، لكن حتى الطيور العادية و الحشرات في العديد من أجزاء العالم تنقرض إلى الأبد. وفقا لتقرير منظمة الحياة البرية العالمية و جمعية الحيوان في لندن ، فإن عدد الحيوانات البرية في العالم انخفض بمعدل 52 % منذ عام 1970 م .

The report also carries the warning that humans are using resources faster than the planet can restore. For example, we are cutting down forests more quickly than newly-planted trees can grow, overfishing is causing a marine imbalance, and pollution is becoming harder and harder to control.

و أيضا يحمل التقرير تحذيرا من أن البشر يستخدمون الموارد أسرع مما يستطيع كوكب الأرض تجديده. مثلا، نحن نقطع الغابات بسرعة أكبر مما تستطيع الأشجار المزروعة حديثا أن تنمو ، و يسبب الصيد الجائر عدم توازن بحري ، و التلوث تصبح السيطرة عليها أصعب و أصعب.

The authors of the report hope that this picture will serve as a wake-up call to all of us. They want to emphasise how important it is for each one of us to take responsibility for our actions, and to protect our planet by thinking carefully about everything we do.

و يأمل مؤلفو التقرير أن هذه الصورة ستكون بمثابة للاستيقاظ لنا جميعا . هم يريدون التأكيد كم هو مهم لكل واحد منا أن يتحمل المسؤولية عن اعمالنا ، و أن نحمي كوكبنا من خلال التفكير مليا في كل ما نقوم به.
