"Will not" is contracted as follows _____

Marks: 1

Choose one answer.

- a. want
- b. wouldn't
- c. won't
- d. went

31

Which one of the following questions is correct? _____

Marks: 1

Choose one answer.

- a. Have you ever break your arm ?
- b. Have you ever breaking your arm?
- c. Have you ever broke your arm ?
- d. Have you ever broken your arm ?

32

..... you sbnent yesterday?

Marks: 1

Choose one answer.

- a. did
- b. Where
- c. Was
- d. Were

33

I live in a very _____ house and I don't like it-

Marks: 1

Choose one answer.

- a. safe
- b. comfortable

33

I live in a very _____ house and I don't like it-

Marks: 1

Choose one answer.

- a. safe
- b. comfortable
- c. shabby
- d. private

34

Marks: 1

From far out in space, Earth looks like a blue ball. Since water covers three-fourths most. The continents look brown, like small islands floating in the huge, blue sea blanket. The Earth is shaped like a sphere, or a ball. It is 25,000 miles around! planet. A spaceship can fly around the widest part of the sphere in only 90 minutes.

Even though spaceships have traveled to the Moon, people cannot visit the Moon. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. They brought back Moon rocks, which scientists are still studying. There are holes on the Moon. Some people believe that meteorites smashed into the Moon millions of years ago and (formed craters).

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun is a medium-sized star. Billions of far-away stars are much bigger than our Sun. The Sun warms the Earth from 93 million miles away! Even though the Sun is always glowing, Earth rotates, or turns around, every 24 hours. During the day, the Earth faces the Sun. At night, it turns away from the Sun. Then it faces the darkness of space.

Each day we learn more about the Earth, the Moon, and the Sun.

What causes daylight on Earth? _____

Choose one answer.

- a. Daylight is caused by the Earth facing away from the Sun.
- b. The full Moon causes daylight.
- c. The heat of the Sun's rays causes daylight.
- d. Daylight is caused by the Earth facing toward the Sun.

35

The person who illegally goes into other people's computer systems is a

Marks: 1

Choose one
answer.

- a. hacker
- b. whiz
- c. technophile
- d. vet

36

I will tell him the news _____ I see him -

Marks: 1

Choose one
answer.

- a. as soon as
- b. never
- c. rarely
- d. seldom

37

A: Pick up the toys, please - B: No problem, I _____

Marks: 1

Choose one
answer.

- a. will pick up them
- b. will pick them up
- c. won't pick up them
- d. won't pick them up

38

Smoking can _____ lung cancer-

Marks: 1

Choose one
answer.

- a. result
- b. harm

Smoking can — lung cancer-

Choose one
answer.

- a. result
- b. harm
- c. cause
- d. die

From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, most. The continents look brown, like small islands floating in the huge, blue sea. White clouds wrap around blanket. The Earth is shaped like a sphere, or a ball. It is 25,000 miles around! It would take more than a year to go around the planet. A spaceship can fly around the widest part of the sphere in only 90 minutes.

Even though spaceships have traveled to the Moon, people cannot visit the Moon without special suits. The plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were more. They brought back Moon rocks, which scientists are still studying. There are holes, or (craters), all over the Moon. Scientists believe that meteorites smashed into the Moon millions of years ago and (formed) the craters.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big because it is a medium-sized star. Billions of far-away stars are much bigger than our Sun. The burning gases from the Sun warm the Earth from 93 million miles away! Even though the Sun is always glowing, the night here on Earth. Earth rotates, or turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. At night, Earth turns away from the Sun. Then it faces the darkness of space.

Each day we learn more about the Earth, the Moon, and the Sun.

Which of the following sentences best describes the Sun? _____

Choose one
answer

- a. The Sun is a ball of burning gases that gives the Earth heat and light.
- b. The Sun is a small star.
- c. The Sun looks small because it is so far from Earth.
- d. The Sun is not as hot as it looks.

The Final Exam

From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the color we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds wrap around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. It is 25,000 miles around! It would take more than a year to walk around the whole planet. A spaceship can fly around the widest part of the sphere in only 90 minutes.

Even though spaceships have traveled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon. They brought back Moon rocks, which scientists are still studying. There are holes, or craters, all over the Moon's surface. Scientists believe that meteorites smashed into the Moon millions of years ago and **formed** the craters.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big because it is so close. But the Sun is just a medium-sized star. Billions of far-away stars are much bigger than our Sun. The burning gases from the Sun are so hot that (they) warm the Earth from 93 million miles away! Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth rotates, or turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space.

Each day we learn more about the Earth, the Moon, and the Sun.

What does (formed) in paragraph 2 mean? _____

Choose one answer

- a. made
- b. broke
- c. stopped
- d. hit

When we travel to foreign countries, we _____ get the visa required for each country.

Choose one answer

- a. had better
- b. should
- c. don't have to
- d. have to

3 "The exam is difficult"- I wish _____

Marks: 1

Choose one answer.

- a. the exam is not difficult
- b. the exam was difficult
- c. the exam is not easy
- d. the exam were easier

4 There _____ enough ink in the bottle-

Marks: 1

Choose one answer.

- a. haven't
- b. aren't
- c. weren't
- d. isn't

5 I think there are _____ cars on the road-

Marks: 1

Choose one answer.

- a. too many old
- b. too old many
- c. too old much
- d. too much old

6 Could you please _____ me your credit card number?

Marks: 1

Choose one answer.

1 From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the color we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds wrap around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. It is 25,000 miles around! It would take more than a year to walk around the whole planet. A spaceship can fly around the widest part of the sphere in only 90 minutes.

Even though spaceships have traveled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon. They brought back Moon rocks, which scientists are still studying. There are holes, or (craters), all over the Moon's surface. Scientists believe that meteorites smashed into the Moon millions of years ago and (formed) the craters.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big because it is so close. But the Sun is just a medium-sized star. Billions of far-away stars are much bigger than our Sun. The burning gases from the Sun are so hot that (they) warm the Earth from 93 million miles away! Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth rotates, or turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space.

Each day we learn more about the Earth, the Moon, and the Sun.

The pronoun they in the last paragraph refers to _____.

Choose one
answer

- a. the burning gases
- b. suns
- c. the Earth
- d. hot planets

15 Nurses _____ a uniform- It's the law!

Marks: 1

Choose one answer.

- a. has to
- b. has to wear
- c. have to wear
- d. needs to wear

16 You can _____ a text to make it clearer by using the mouse of the computer-

Marks: 1

Choose one answer.

- a. delete
- b. minimize
- c. close
- d. highlight

17 If you want to make a phone call, make sure to _____the number correctly-

Marks: 1

Choose one answer.

- a. move
- b. dial
- c. hide
- d. carry

18 The radio is too loud; I need to_____

Marks: 1

Choose one

- a. turn down it

18

The radio is too loud; I need to——

Marks: 1

Choose one answer

- a. turn down it
- b. it turn down
- c. turn it down
- d. down turn it

19

She — to make her own decision-

Marks: 1

Choose one answer

- a. enough is old
- b. enough old is
- c. old is enough
- d. is old enough

20

Q Have you ever —— fish? A. No- I prefer to bake it-

Marks: 1

Choose one answer

- a. eat
- b. baked
- c. catch
- d. steamed

21

"Don't sit there" - The correct polite request form of this sentence is "would you mind -

Marks: 1

Choose one answer

- a. sit there
- b. don't sit there

21 "Don't sit there" -The correct polite request form of this sentence is "would you mind _____"

Marks: 1

Choose one answer.

- a. sit there
- b. don't sit there
- c. not sitting there
- d. sat there

22 Jack is going to be at the meeting tomorrow- I think Sarah _____come too-

Marks: 1

Choose one answer

- a. are going to
- b. am going to
- c. will
- d. won't

23 Q. _____ sports did you use to play? A. I _____ used to play sports, but now I play tennis-

Marks: 1

Choose one answer.

- a. when/ did not
- b. what/ did not
- c. when/ never
- d. what/ never

24 I _____ my grandmother next week-

Marks: 1

Choose one

- a. would visit

24

Marks: 1

I _____ my grandmother next week.

Choose one answer

- a. would visit
- b. visited
- c. am going to visit
- d. visiting

25

Marks: 1
