(3) عدد الاسئلة: (5)، وعدد الصفحات: (4).

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text

Health conditions in Jordan are among the best in the Middle East. This is largely due to the country's commitment to making healthcare for all a top priority. Advances in education, economic conditions, sanitation, clean water, diet and housing have made our community healthier.

As a result of careful planning, the number of healthcare services has been increasing rapidly over the past years. More than 800 different kinds of healthcare centres have been built, as well as 188 dental clinics. In 2012 CE, 98 per cent of Jordanian children were fully immunised. Thanks to immunisation teams that had been working towards this goal for several years.

Although the country has been focusing mainly on improving its primary healthcare facilities, it has not neglected its advanced medical facilities. The reputation of Jordanian doctors has spread in the region, and now many more patients' come to Jordan for open heart surgery. In Jordan, the open heart surgery programme started in 1970 CE in Amman.

The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2012 CE, this average life expectancy had risen to 73,5. According to UNICEF statistics, between 1981 CE and 1991 CE, Jordan's infant mortality rates declined more rapidly than anywhere else in the world - from 70 deaths per 1,000 births in 1981 CE to only 32 deaths per 1,000 births in 2014 CE.

These have been contributing factors to Jordan's healthy population growth. This will be producing a strong work force and economic benefits for the whole country next decades.

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

The Arab world has many famous chemists in its history, but the person who is known as the founder of chemistry is probably Jabir ibn Hayyan. He is most well known for the beginning of the production of sulphuric acid. *He* also built a set of scales, which changed the way in which chemists weighted items in a laboratory: his scales could weigh items over 6,000 times smaller than a kilogram.

Ali ibn Nafi ' is also known as 'Ziryab' (or 'Blackbird', because of his beautiful voice). He was a gifted pupil of a famous musician from Baghdad, and it was his talent for music that led him to Cordoba in the ninth century CE. He was the guest of the Umayyad ruler there. He is the person who established the first music school in the world in Cordoba, Al-Andalus, teaching musical harmony and composition. He revolutionised musical theory, and is also the person who introduced the oud to Europe.

Fatima al-Fihri was the daughter of a wealthy businessman. She used her father's inheritance to build a learning centre in Fez, Morocco. This learning centre became Morocco's top university, and it is where many students from all over the world come to study. Moreover, it was Fatima's sister, Mariam, who supervised the building of the Andalus Mosque, which was not far from the learning centre..

Al-Kindi was a physician, philosopher, mathematician, chemist, musician and astronomer – a true polymath. He made ground-breaking discoveries in many of these fields, but it is probably his work in arithmetic and geometry that has made him most famous.

3- scales
4- The Arab world.

5 - Kindi was a physician, philosopher, mathematician, chemist, musician and astronomer
6- يقال انه كان من الصعوبة في تلك الأيام للوصول إلى مثل هذه المستويات العالية من الإنجاز مقارنة مع يومنا هذا. فكر بهذه العبارة وفي جملتين اكتب وجهة نظرك.

I think that it was more difficult for people in the past to reach such high levels of achievement in comparison with the present day: there was much less access to information in the past, so people like Al-Kindi had to be truly creative in their thinking in order to succeed.

أعتقد أنه كان من الصعب على الناس في الماضي الوصول إلى مثل هذه المستويات العالية من الإنجاز مقارنة مع يومنا هذا: كان الوصول إلى المعلومات أقل بكثير في الماضي، لذلك الناس مثل الكندي كان عليهم أن يكونوا مبدعين وخالقين في تفكيرهم من أجل تحقيق النجاح.

7- "ازدهرت الحضارة الإسلامية المشرقة في المنطقة الممتدة من الهند إلى إسبانيا."

Craftspeople

Crafts are important to continue awareness of history and traditions of Jordan. Although traditional crafts have no place in today's society, we should do all our best to keep our traditions alive.

It is universally understood that everyone deserves a salary in proportion with the difficulty, danger and ultimate importance of the work that they do. For this reason, it must be argued that craftspeople deserve larger salaries.

On the other hand, Crafts are sold at vast expense; people who make these items should see most of the profits. However, The dangerous work that goes into craftsmanship should be well rewarded.

For the reasons stated above, it can be clearly seen that craftspeople are owed a livable salary that reflects the risk they put themselves in daily, as well as their contribution to keeping Jordanian traditions alive.

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

Ten-year-old Adeeb al-Balooshi, from Dubai, is going to travel to seven countries on a tour which has been organised and funded by Sheikh Hamdan bin Mohammad, Crown Prince of Dubai. The boy caught Sheikh Hamdan's attention with his invention – a prosthetic limb for his father. The Sheikh has taken a special interest in the boy, and hopes the tour that he is sponsoring for Adeeb will give the young inventor more self-confidence and inspire other young Emirati inventors.

Adeeb got the idea for a special kind of prosthetic leg while he was at the beach with his family. His father, who wears an artificial leg, could not swim in the sea as he could not risk getting his leg wet. This inspired Adeeb to invent a waterproof prosthetic leg.

Adeeb is going to visit the USA, France, the UK, Ireland, Belgium, Italy and Germany, where he will be staying with relatives. However, while he is in Germany, Adeeb will not be spending all his time sightseeing. He will be working with a specialist doctor to build the appendage. He will also be attending a course on prosthetics and learning about different kinds of medical apparatus.

Adeeb has invented several other devices, including a tiny cleaning robot and a heart monitor, which is attached to a car seat belt. In the case of an emergency, rescue services and the driver's family will be automatically connected with the driver through this special checking device. He has also invented a fireproof helmet. This special equipment, which has a built-in camera system, will help rescue workers in emergencies. It is for these reasons that Adeeb rightly deserves his reputation as one of the youngest inventors in the world.

Question Number One:- (22 points)

A.

- 1- The article mentions different devices that Adeeb invented. Write down two of these devices. (4 points)
- 2- Find a word that means " **made or produced by human beings rather than occurring naturally**" (2 points)
- 3- Quote the sentence which indicates that Adeeb isn't visiting Europe for tourism only. (2 points)
- 4- Sheikh Hamdan bin Mohammad has funded Adeeb a world tour for two causes. Write these two causes. (2 points)
- 5-What does the underlined word " **it**" refer to? (2 points)

The technology and people in the future

Life in the future will never be as life these days. Many of the aspects of our daily routine will be completely different and others will disappear in the coming future. Hospitals will have robots, which can test patients and prescribe the appropriate medicine for patients while they are at home. Moreover, robots could participate in making medical surgeries all over the world.

At school, weather conditions will never be a problem anymore because students can attend the class while they are at home or even if they are at hospitals. Finally, at home, parents will be able to have an eye on their children while parents are away from home. This will make life easier.

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

The King Hussein Cancer Center (KHCC) is Jordan's only comprehensive cancer treatment centre. It treats both adult and paediatric patients. As the population of the country increases , more and more families will rely on the hospital for cancer treatment. Patients come not only from Jordan but also from other countries in the region, as they are attracted by its excellent reputation, lower costs, and cultural and language similarities.

In order to cope with the increase in demand for treatment, the KHCC has begun an expansion programme. Building started in 2011 CE. The hospital will have more than doubled its capacity by 2016 CE, increasing space for new cancer cases from 3,500 per year to 9,000.

There are five medical schools in Jordan, each one based at a university. All five schools offer a six-year programme, which is designed to produce top-quality doctors. For the first three years, the students follow a programme of academic study, which includes compulsory, as well as elective courses. These first three years are known as the 'pre-clinical stage'.

Years four, five and six, or the 'clinical stage', are much more practical, although there is still plenty of theory too. The students spend time in different hospital departments. At this stage, the students deal with patients directly, all the time being supervised by senior doctors. The final assessment is a very thorough series of written and practical examinations. Successful students are awarded a Bachelor of Medicine and Surgery degree.

The advantages and disadvantages of internet

With the development of technology and the massive need of the internet. The internet became an essential element in our daily life. The internet could affect our life in many different ways because all our needs depend on the internet. Everyone needs the internet in his work like doctors, engineers, teachers and students.

Using the internet has many advantages. It makes us able to collect information about any subject in a simple and a convenient way. It could make people communicate with other people from different countries easily. In addition, it made great contributions in medicine and enables doctors to make surgeries online. Moreover, it made the students able to attend classes and conferences held in other countries from the place where they live.

However, the internet has some disadvantages because it affected the relationships between relatives badly. Moreover, the number of serious crimes is increasing dramatically which made many of us live in fear and agony. The internet will always be a good invention if it is used for the prosperity of our future.

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms. Here are some ideas:

Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programmes, play educational games, music, recordings of languages, and so on.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Teachers can perhaps ask their students to start writing a blog (an online diary), either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages.

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them.

Question Number One:- (20 points)

Health facilities in Jordan

Introduction

Health facilities in Jordan is among the best in the Middle East. The aim of this report is to discuss health facilities in Jordan.

Health care centers

There are more than 800 well-equipped health centres in all over Jordan. In addition, there are more than 188 dental clinics. These centers provide excellent health care to millions of Jordanians.

Hospital

There are many hospitals in Jordan spread in all cities like King Hussein center for cancer in Amman, King Abdullah in Irbid. These hospitals have well-qualified doctors who have good reputation. Moreover, many patients from Arab countries come to Jordan to make surgeries like open heart surgery.

life expectancy

The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2012 CE, this average life expectancy had risen to 73, 5.

Conclusion and recommendation

It appears that Jordan has excellent health care centers as well as well-qualified doctors. It is recommended to increase hospitals in the cities of the south of Jordan like Kerak and Aqaba.

Scientists have successfully invented a prosthetic hand with a sense of touch. It is an exciting new invention, which they plan to develop. It is possible that, in the not-too-distant future, similar artificial arms and legs will have taken the place of today's prosthetic limbs.

Dennis Sorensen, a 39-year-old from Denmark, was the first person to try out the new invention. After losing his left hand in an accident, he had been using a standard prosthetic hand for nine years. The new hand, which was developed by Swiss and Italian scientists, was a huge improvement.

With it, Sorensen could not only pick up and manipulate objects, but he could also feel them. 'When I held an object, I could feel if it was soft or hard, round or square,' he explained. He said that the sensations were almost the same as the ones he felt with his other hand.

Unfortunately, Sorensen was only taking part in trials, and the equipment is not ready for general use yet. He was only allowed to wear it for a month, for safety reasons. So now he has his old artificial hand back. However, he hopes that soon he will be wearing the new type of hand again. He is looking forward to the time when similar artificial limbs are available for the thousands of people who need them. He will have helped to transform their lives.

1-

The technology and people in the future

Life in the future will never be as life these days. Many of the aspects of our daily routine will be completely different and others will disappear in the coming future. Hospitals will have robots, which can test patients and prescribe the appropriate medicine for patients while they are at home. Moreover, robots could participate in making medical surgeries all over the world.

At school, weather conditions will never be a problem anymore because students can attend the class while they are at home or even if they are at hospitals. Finally, at home, parents will be able to have an eye on their children while parents are away from home. This will make life easier.

2- الموضوع الثاني يطلب منك كتابة مقالة حول التطورات المستقبلية بنهاية عام 2100.
