A. Read the text then answer the following question :

Beluga whales are white whales that live in the Arctic Ocean. In winter, they stay in the open ocean, away from the sea ice. But some years ago, a group of them became trapped under the ice. There was only one hole in the ice where they could come up to breathe. But thousands of whales all needed to breathe at the same hole! It was an emergency !A ship, the *Moskva*, started breaking the ice to get to the whales. Slowly, it made a channel to them. But when the *Moskva* finally arrived, the whales didn't want to swim into the channel. The beluga whales were safe at last!
