Text A

Read the following text carefully, and then choose the correct answer. Your answers should be based on the text.

From when he was 16 years old, Aldi had spent weeks at a time working on a fishing trap, known as a rompong. The rompong is a kind of hut which floats in the middle of the sea, but is attached to the sea bed with a rope. Every night he would light lamps to attract the fish to his nets. It was a lonely kind of life.

This day had started just like any other, until the rope attaching his rompong to the bottom of the sea broke and, already far from the coast, he started to drift even further away. At first, he wasn't too worried. He took it for granted that sooner or later his boss would come and rescue him, as he had done before. Aldi had a week's supply of food. He was sure it would all be fine.

Safely back home with his family, Aldi considered his options. His family lived in some hardship and his job was, from his perspective, relatively lucrative at \$134 a month. However, having found himself drifting three times since he started the job aged 16, he and his family decided it simply wasn't worth the risk. From now on, he'll be staying firmly on dry land.

Text B

The doors shut with a thud behind me as I walk into the shopping centre. Immediately, there's a buzz of noise. I can hear two or three different types of music being played in various shops. A woman walks past me, carrying lots of shopping bags. I can hear the sound of them rubbing against each other. I try to shrug it off, but it's made me feel a bit more anxious. The lights are too bright. A man is shaking a pot full of coins – I think he's

collecting money for charity. It's really loud. I carry on through the shopping centre. I can smell fried food. I bump into a friend, but I can't stop to talk to her because it's all so overwhelming. I need to calm down. I need to get out of here.

This is a description of what it might feel like for some people with ASD (autism spectrum disorder) to go to a shopping centre. While people's experiences vary a lot, one of the key issues for many individuals with autism is a hypersensitivity to sights, sounds, smells and tastes, which can make a simple activity, such as going shopping extremely stressful. Some people are able to cope with this kind of sensory overload reasonably well, though the stress might eat away at them inside. But for others, they end up having a meltdown – in other words, they get upset or angry. This can make it difficult to fit in with or to keep friends because other people just don't understand the pressure that has led the person with autism to act in this way. It can also lead to people with autism having problems at school or with holding down a job, as they may come across as unreliable or bad-tempered.

1. According to the text, the writer states that people with autism suffer from hypersensitivity to .different senses. Mention two of them. (3 points)
2. Write down the sentence which shows the reason why a man was shaking a pot in the shopping centre. (3 points)
